MISSION STATEMENT

Our mission is to provide technical services in an agile way, whether it is electrical and mechanical assembly, installation, engineering, welding and commissioning or all of these combined. We aim to make your business more successful by offering you scalable resources, available to you wherever and whenever you need them. We are a responsible business partner and employer who ensures a reliable quality of service, cares for the environment and invests in its staff.

VALUE ADDED TO YOUR BUSINESS

As a technical partner, Eryk combines high quality and flexibility of service with cost optimization. With us, it is easier to adjust your capacity to the ever-

changing market conditions, to expand to new markets, or to concentrate on your core business and leave the assembly, installation, welding or commissioning to us — anywhere in the world! No need to research an unfamiliar market for local labor laws and safety regulations, or hire unproven local teams, when Eryk can handle all that, and deliver the job in high quality, at a competitive price within the deadline.

CUSTOMER STORIES

ABB

Jesper Fauerskov
Engineering Manager

Eryk supported ABB on offshore projects in the Danish part of the North Sea. With Eryk we are able to scale up and down, whenever it is needed and we have a stable collaboration partner we can rely on. They respect safety rules and are able to work alone on periodical checks of electrical switchboards as well as team up with our technicians.

Ørsted

Steve Haswell
Ext. Consultant, Fabrication, Wind Power

I want to thank Eryk for all the hard work during the time at OSB on the Hornsea Project One. Eryk's professionalism, ability to identify issues, logical solutions, willingness to assist other electrical contractors when they were struggling, and other acts have really been appreciated not only by myself, but also by the management from both Foundations and WTG departments.

Lars Thybo Andersen
Managing Director, Owner

As a member of the Danish Industry Association (DI) Eryk complies with all Danish regulations and collective agreements. We appreciate Eryk technicians' flexibility, performance, readiness to work long hours and, above all, the effective use of their time on-site.

Jan Skaftte Mikkelsen
Installation & Commissioning Manager

Eryk has a broad resource base and they can send technicians with the exact qualifications we require for the installation and maintenance of our industrial ovens. We get consistently high quality service from them in all our projects.

SELECTED REFERENCES

EuroSort

We are very positive about Eryk and we value the price-quality metric we are getting from them at our assembly and installation projects. We are glad we have found each other.

KNAPP

KNAPP is highly impressed with Eryk's professionalism. As we always work under a tough schedule, we experienced that Eryk is able to meet our deadlines within defined high quality.

Dan Web

We received a great amount of support from the cooperation with Eryk with regard to the rules and regulations abroad, and

their technicians had the necessary competences.

Skako

Our Site Management is very satisfied with the way Eryk's technicians are working – right and safe! We absolutely appreciate the good team-spirit and work ethics of the technicians! Thank you and keep up the good (safe) work!

Solystic

The crucial element is living up to the promise that has been made and this is present in our cooperation.

Micmatic

Eryk's short response time and flexibility hold great value for a small business like ours,

which has a limited number of employees, and therefore is more challenged when the work schedules change.

Maersk Oil

Eryk's employees have what it takes to meet the great demands made by Maersk Oil and Gas regarding quality and safety at work when working offshore with the maintenance of electrical installations.

After over 15 years of success in providing electrical and mechanical assembly, installation and commissioning services around the world, BIC Electric became Eryk, to better reflect the nature of the company. The inspiration for the new name was the figure of Eric of Pomerania – King of Denmark, Sweden and Norway and Duke of Pomerania (born in Darłowo!) – a powerful ruler from the 15th century, who brought immense territories under one rule. The other source was the Pomeranian – a small companion dog with a lion-like attitude – this, on the one hand, reflects our fierce attitude on the market and, on the other, a friendly companionship we offer our customers.

We believe that our new name Eryk and the new logo will be associated with the ideas of loyalty, mobility, reliability and quality of technical service.
